

Mixtuur

Block Organ

Hauptwerk

Have you always wanted to play the Father Willis-organ of the Salisbury Cathedral? Or the Christian Müller organ of the Grote of Sint-Bavo Kerk in Haarlem? Mixtuur and Hauptwerk™ can make the impossible a reality, enabling you to play the organs of your dreams, in high fidelity, right in your own living room or studio!

How does it work?

Hauptwerk™ is a powerful software program based on MIDI that enables you to load sample sets from organs that have been meticulously sampled. The sound of each individual pipe of the sampled organ has been individually recorded — including the attack transient of the pipe, the development of the note, and the release. The result is a vibrant sound. This also means a staccato note will sound different from the same note played legato. Hauptwerk™ produces a highly realistic sound rendering, ensuring that you will truly experience the organ.

Virtually limitless possibilities

Whereas the original organs have their natural limits, Hauptwerk™ transcends them. You can easily change the organ's temperament or pitch without having to adjust each pipe individually. Furthermore, you can have multiple sample sets on a single organ, from Baroque to Romantic. There are currently sample sets from hundreds of organs available. You can just as easily play Bach on a Silbermann as you can Franck on a Cavaillé-Coll; Hauptwerk™ makes it all possible. In short: play and experience music the way it was intended!

The result

Playing a Mixtuur organ is always a delight. And you needn't keep it to yourself, because with Hauptwerk™ you can easily make your own recordings in CD quality, or as MIDI files, to share your music with family and friends. A Mixtuur organ gives you the ultimate opportunity to experience your music at home!

“
The
unmistakable
sound of
Mixtuur”

Mixtuur Block Organ

The block organ is a basic organ that can be easily adapted to your wishes, becoming the organ of your dreams. The block organ is available in versions with two to five manuals, and produced in natural oak as standard, with other colours and woods available. By default, the organ is delivered with two premium speakers and a subwoofer, each with their own power amplifier. Combined with the advanced Digital Signal Processor (DSP) designed in-house by Mixtuur Orgels, the result is the best possible sound.

Easy operation

The touchscreen allows you to operate the Hauptwerk™ software with ease. Each sample-set builder has their own layout, giving you the experience of truly being in the presence of the original organ. The organ also has a small touchscreen for an extra menu. All of the organ's features are easily accessible through the menu; with options, for example, to adjust the temperament or reverb (virtual listening position), or to make your own recordings (in MIDI or audio). Knowledge of Hauptwerk™ is not required!

Sophisticated technology

Mixtuur Orgels goes further than other suppliers. The menu touchscreen was developed in-house by Mixtuur Orgels and provides optimal control over your organ. This touchscreen works seamlessly with the Hauptwerk™ software, making use a breeze. The included speaker set guarantees Mixtuur Orgels' high audio fidelity. Thanks to our proprietary audio technology, you can count on a perfect result.

Ultimate experience

With the Block Organ, Mixtuur offers you the ultimate music experience in your music room. Thanks to the many available options, the organ can be fully tailored according to your needs. Make a no-obligation appointment to come play, listen to and experience the organ for yourself. We'd love to show you the possibilities.

The authentic sound of famous organs performed by your Mixtuur organ

Mixtuur Orgels

Mixtuur Orgels has been at the forefront of Hauptwerk™, audio technology and MIDI consoles for many years now. Mixtuur Orgels was there since the very introduction of Hauptwerk™ in the Netherlands. With a production hall in Veenendaal and a showroom in de Stad Klundert, the former Church of Saint John the Baptist, Mixtuur Orgels has been an official Hauptwerk™ dealer for the Benelux since 2007.

Why Mixtuur?

Mixtuur builds organs for individuals, churches and concert halls. Models vary from standardised organs to tailored instruments. All Mixtuur organs are developed, constructed and tested fully in-house, using proprietary technologies developed by Mixtuur to harmonise seamlessly with the Hauptwerk™ software. Besides the organs themselves, we manufacture all audio components such as amplifiers and speakers in-house, guaranteeing the optimal sound experience for your dream organ!

Mixtuur quality

By constructing our own instruments and audio components, we are able to guarantee the highest possible quality for every customer. At an affordable price, too: comparable audio systems from other manufacturers tend to be far more expensive. This also means we can provide you with superior service; we can be certain that we'll always be able to help you – now and in the future – since we're not dependent on other suppliers.

Customer satisfaction

Mixtuur Orgels believes strongly that customers should be able to enjoy their organs with complete satisfaction and no worries. That's why Mixtuur Orgels guarantees the quality of its instruments and audio, providing a 5-year warranty.
