

Mixtuur

YOU CAN HEAR THE DIFFERENCE!

Only the best is
good enough

foreword

Speaking of inspiration. Many organ enthusiasts around the world are inspired and challenged daily by their Mixtuur. Some at home. Others at a concert. Grand sounds fill the space. The whisper of wind is audible. The creak of a register echoes through the room. After a lively and immersive performance, the final tones fade away along the monumental vaults... That is playing a Mixtuur, wherever you are. A magnificent experience. An invitation to surpass your own musical achievements time and time again.

For this experience, all you need is an ordinary living room—and a Mixtuur. If you knew the computing power required to generate these sounds, if you were familiar with the secrets of the software, you would be even more amazed. But you don't need to know. At Mixtuur, we hide this technology behind a user-friendly touchscreen that requires no more expertise than playing a pipe organ. In the development of these organs, we continuously push the boundaries.

Take, for example, our new Intrada Progresso, the successor to the renowned Intrada. Or our new model Duett. These organs are incredibly easy to operate via built-in touchscreens. Organs that also contain the most optimized audio technology. They bring an unparalleled sound experience to any space. All the knowledge and years of experience within our development team come together in these instruments.

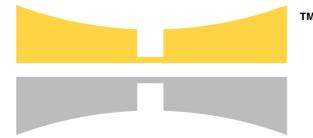

This brochure gives you a first impression of the Mixtuur brand and our models. Visit one of our dealers or come to our showroom in Klundert (housed in a monumental church), and experience the Mixtuur for yourself. Everything we can say about our quality comes together in that one experience. On the organ bench. Welcome!

Henk Strootman

We all strive
for the best

HAUPTWERK
VIRTUAL PIPE ORGAN

The secret of the ultimate organ...

What is the secret of the ultimate home or concert hall organ? When the first virtual organs were developed a few decades ago, that was the answer. Anyone with a keyboard, a computer, and a sound system could play a 'church organ'. A breakthrough in the organ world like no other. And yet, in the following years, it became clear that the best sample sets reveal their hidden secrets only on the best instruments. Since 2006, it has been our mission to develop and build these instruments.

Dedicated team

We could tell you about our development department. We could invite you to our monumental showroom (the former St. John the Baptist Church) in Klundert. We could show you the chips, circuit boards, and processors we designed. But the true strength of Mixtuur Orgels lies elsewhere. It is

the drive of a small, dedicated team. Passionate developers and organ enthusiasts, surrounded by specialized suppliers. People who enjoy creating the very best but also believe that it can always be made even better.

Time and again, this is proven to be true. Take, for example, our even further optimized speakers, which guarantee an unmatched sound experience in almost any space. Or look at the refined design of the interior of the organ, with a large 'bass compartment' that allows you to feel the low tones. There are numerous major and minor developments that make Mixtuur organs the best in their class.

Inspired

The development and assembly of our organs take place in Veenendaal. From here, we also handle transportation

to customers worldwide and provide service and technical support. Our organs inspire many organ enthusiasts and professional organists. But it also works the other way around. The experiences of all these Mixtuur customers inspire us. We meet around a shared passion.

"Mixture sounds better, you can hear the difference!"

Mixtuur offers a complete solution

Mixtuur has been an authority in the field of Hauptwerk organs for years and has developed proprietary technologies that seamlessly integrate with Hauptwerk™ software. In addition, Mixtuur manufactures all audio components itself, such as speakers and amplifiers. This guarantees an optimal sound experience. With a powerful PC system, high-quality audio, and a beautiful console, Mixtuur delivers a total solution for electronic organs. Each organ is tailored to your personal preferences. Do you want wooden keyboards, real stop knobs, or the ability to stream music to your organ? Everything is negotiable.

Visit our showroom or check our website www.mixtuur.com for more information.

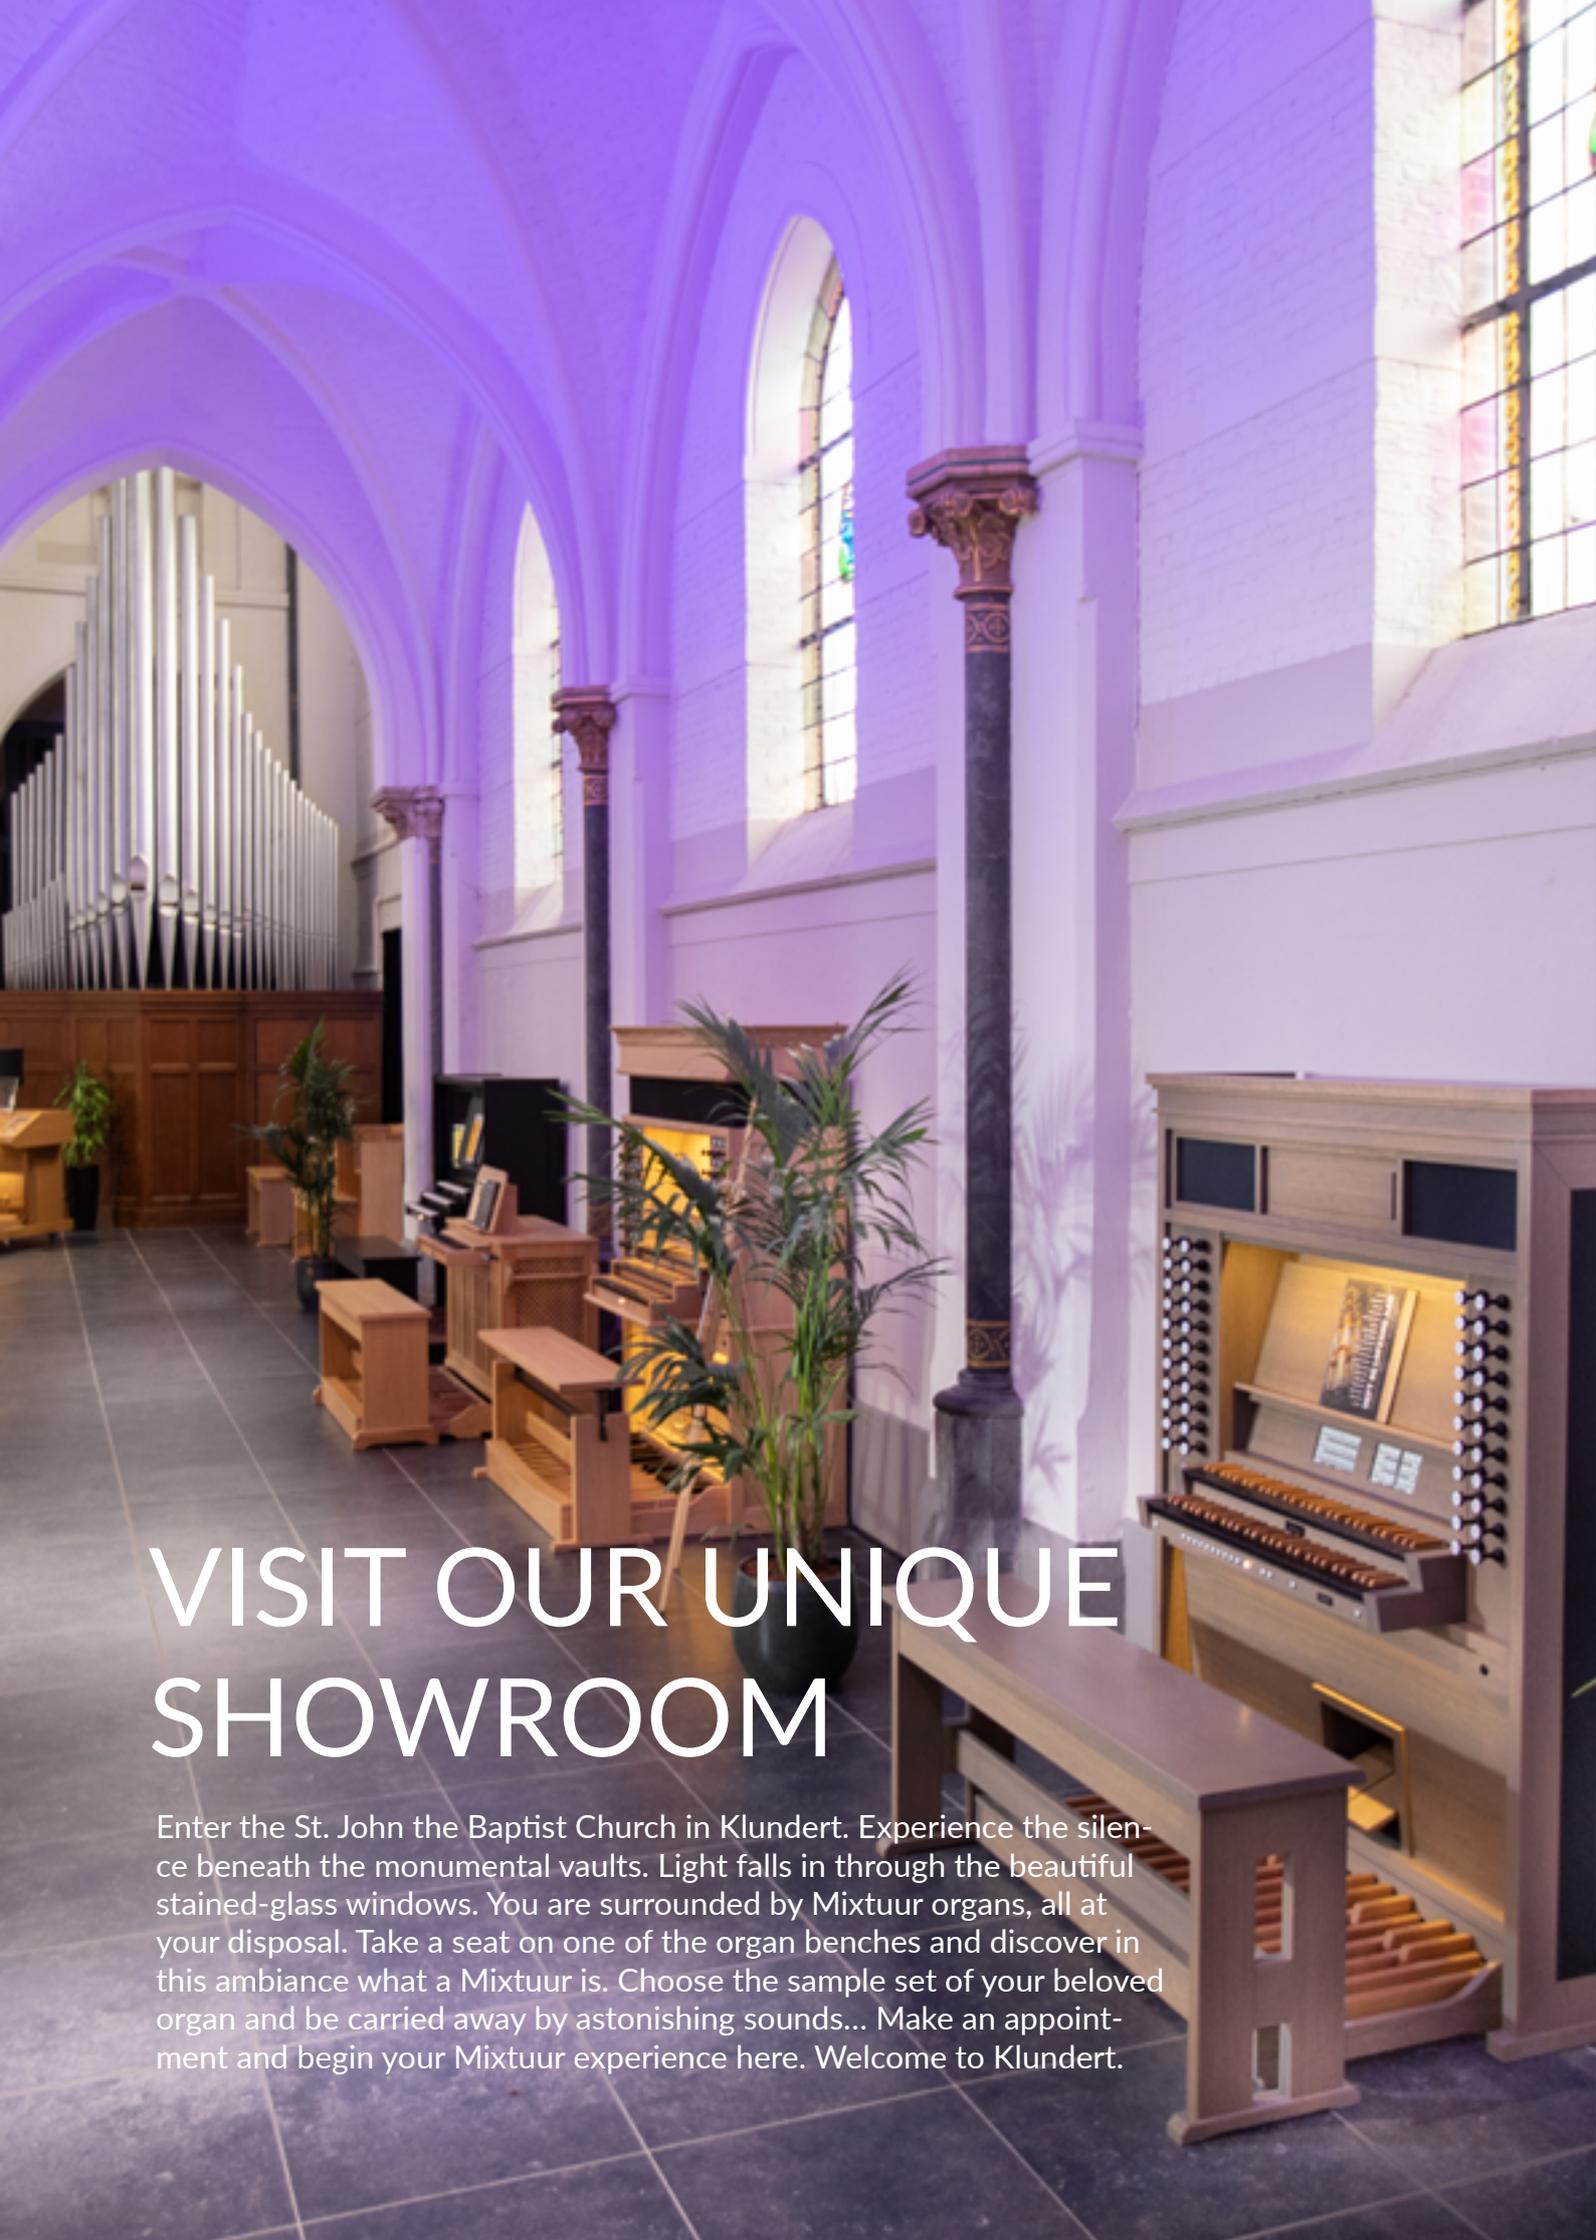

The unique sound experience of a Mixtuur is made possible in part by Hauptwerk™. This is the name of a technology that allows the sound of real pipe organs to be digitally recorded and played back. The sound of each pipe (!) must be recorded separately in the corresponding church. To achieve a lively reproduction, recordings must capture both the attack of the pipe, the tonal development, and the release of the note. You can imagine how much data one digital pipe organ contains (this is the so-called 'sample set'). And the computing power required to instantly produce the correct sounds as you play Widor's Toccata...

Authentic sound

Using Hauptwerk™ technology, we build organs with an extraordinarily vivid and authentic sound. Because this sound is based on real recordings, you also hear ambient noises, such as wind sounds or mechanical noises when operating the registers. This enhances your musical experience. If you close your eyes, you can imagine yourself sitting at the console in an immense church. Which church? That is up to you. Hundreds of organs are available as sample sets. You can just as easily play Bach on a Silbermann as Franck on a Cavallé-Coll. Or would you prefer to bring 'Haarlem' to life? The choice is yours. On a single Mixtuur, you can use as many sample sets as you like.

Digital technology

Because every sound consists of bits and bytes, you can easily make recordings with a Mixtuur. You can then share MIDI files with others. This allows you to take full advantage of this digital technology. You don't need IT knowledge for this. On the contrary. Most of our organs come equipped with touchscreens featuring very simple operation. If you enjoy exploring all the possibilities of Hauptwerk™ software, that is also possible. Above all, enjoy this technology in the way that suits you best!

VISIT OUR UNIQUE SHOWROOM

Enter the St. John the Baptist Church in Klundert. Experience the silence beneath the monumental vaults. Light falls in through the beautiful stained-glass windows. You are surrounded by Mixtuur organs, all at your disposal. Take a seat on one of the organ benches and discover in this ambiance what a Mixtuur is. Choose the sample set of your beloved organ and be carried away by astonishing sounds... Make an appointment and begin your Mixtuur experience here. Welcome to Klundert.

Explore Mixtuur's collection of organs. From compact home organs to impressive concert hall instruments. But: all are Mixtuur organs. All equipped with the superior audio technology for which our organs are known and loved. Some are designed primarily for practicality and ease of use, while others feature touchscreens that provide full access to all Hauptwerk™ functionality. Follow your heart.

Mixtuur

Standard organ collection

Duett III

The 3-manual Duett has won the hearts of many home organists. This compact organ offers a grand playing experience, thanks in part to the carefully positioned speakers. You register the organ via two 10" touchscreens. The Duett can be played as standard with Hauptwerk sample sets, as well as with other advanced technologies.

3 digital power amplifiers and 5 high-quality speakers – 30-note straight pedalboard – standard bench – Option to connect (un)amplified surround sound
Dimensions: H 128 (height without music stand) x W 130 x D 92 (incl. pedalboard)

Intrada

Take a seat at the Intrada, tap the desired stops on the touchscreens, and fill your living room with church organ music... This model is available with two or three manuals.

Available in II or III manual versions – 6 digital power amplifiers – 6 high-quality speakers – 30-note straight pedalboard – bench with storage compartment
Dimensions: II manuals: H 118 (height without music stand) x W 140 x D 95 (incl. pedalboard)
Dimensions: III manuals: H 125 (height without music stand) x W 140 x D 95 (incl. pedalboard)

Intrada Progresso

This new model brings together Mixtuur's finest insights and technological advancements. Its refined console design is visible. The rich sound of the newly balanced speaker system is audible. You can expand the Intrada Progresso with options such as multiple rows of toe pistons, a roller swell, and audio upgrades. Ideal for the true organ enthusiast.

6 digital power amplifiers – 6 high-quality speakers –
30-note straight pedalboard – bench with storage compartment
Dimensions: H 122 (height without music stand) x W 140 x D 95 (incl. pedalboard)

V-Touch

With the V-Touch, you will never run out of possibilities. The sound experience is phenomenal, thanks in part to the high-quality five carefully positioned speakers. Use the 17" touchscreens to select your registration and control all functions of the Hauptwerk™ sample sets. Do you prefer two or three manuals?

Available in III or IV manual versions – 5 digital power amplifiers – 5 high-end speakers – 30-note straight pedalboard – bench with storage compartment
Dimensions: V-Touch III manuals H 171 x W 158 x D 104 (incl. pedalboard)
Dimensions: V-Touch IV manuals H 178 x W 158 x D 104 (incl. pedalboard)

Andante

As the name suggests, this model was developed specifically for our dealer Andante. A sleek and timeless console that enhances the joy of playing. The audio technology is of the highest standard. An optional surround system provides a maximally immersive experience.

5 digital power amplifiers – 5 high-end speakers –
30-note straight pedalboard – bench with storage compartment
Dimensions: H 180 x W 132 x D 104 (incl. pedalboard)

Kabinet Exclusief

Mastery. That is what this organ promises, with its beautiful case and wooden draw stops. Sitting on this bench, you feel like you're at a church organ. The sound experience is masterful, a result of six sublime speakers and a subwoofer. Hidden from view are the retractable touchscreens, allowing you to easily switch between different sample sets. Let yourself be inspired!

7 digital power amplifiers – 7 high-end speakers –
30-note straight pedalboard – French bench
Dimensions: H 202 x W 171 x D 101 (incl. pedalboard)

Virtuoso

Organists worldwide consciously choose a Mixtuur. For them, we have developed this model with a 32-note AGO pedalboard. The Virtuoso III boasts no less than four 7" touchscreens, offering a total of 120 stops. The most extensive dispositions are easily controlled with the 42 thumb pistons and ten toe pistons. Three swell pedals and an adjustable music stand complete the playing comfort for any organist.

6 digital power amplifiers – 6 speakers

32-note AGO pedalboard – French bench

Dimensions: H 121 (without music stand) x W 144 x D 119 (incl. AGO pedalboard)

Positief

The Positief model has a stately appearance—a jewel in your interior. And yet, thanks to its compact width, this inspiring organ fits into most living rooms. The wooden draw stops can be assigned to your favorite sample set. Additionally, the 2-manual model offers sixty virtual stops, while the 3-manual model has ninety. Go ahead and play!

6 digital power amplifiers – 6 speakers
30-note straight pedalboard – bench with storage compartment
Dimensions: Positief II H 188 x W 140 x D 94 (incl. pedalboard)
Dimensions: Positief III H 195 x W 140 x D 94 (incl. pedalboard)

Maestro

With this organ, you take your musical performance to the next level. You have three manuals with 54 draw stops—or four manuals with ninety draw stops—at your disposal. The (digital) stop names adjust automatically based on the selected sample set. Add to that the ninety virtual stops and the three touchscreens, and you understand: on the Maestro, you can indulge in boundless music-making.

7 digital power amplifiers – 7 speakers
30-note straight pedalboard – bench with storage compartment
Dimensions: Maestro III H 201 x W 156 x D 104 (incl. pedalboard)
Dimensions: Maestro IV H 208 x W 188 x D 105 (incl. pedalboard)

Fortissimo

Although the Fortissimo is a Mixtuur organ with advanced Hauptwerk™ technology, it has a familiar appearance with its rocker tabs. These control 72 stops (in the 3-manual model) or 92 stops (in the 4-manual model). Through the touchscreen, you can access an additional thirty virtual stops. A wealth of possibilities. A challenge to push your limits...

Available in III or IV manual versions – 6 digital power amplifiers
6 high-quality speakers – 30-note straight pedalboard – bench with storage compartment
Dimensions: III manuals: H 126 (height without music stand) x W 158 x D 99 (incl. pedalboard)
Dimensions: IV manuals: H 131 (height without music stand) x W 158 x D 103 (incl. pedalboard)

Keyboard Block

Do you want an organ setup that offers flexibility and allows you to tailor your Mixtuur entirely to your preferences? Then the Keyboard Block is an ideal solution. Rich functionality is at the forefront of this model. You can choose from two to five manuals. All digital functions are at your fingertips through the large touchscreens.

Keyboard Block C

II-V manuals – metal stand – built-in computer under the keyboards – stereo balanced outputs – adjustable music stand – 2 metal swell pedals – 30-note straight pedalboard – bench with storage compartment
20 thumb pistons under Man I for presets – 2 headphone connections
Dimensions: L 123 x W 183 x D 98 (in normal pedalboard position)

Mixtuur makes dreams come true! With our knowledge and expertise we can make keyboard blocks according to your wishes, completely customized. In consultation with you we make a design and discuss all possibilities.

Keyboard Block A – MIDI - available from II to V keyboards.

Keyboard Block B – Hauptwerk™ - available from II to V keyboards.

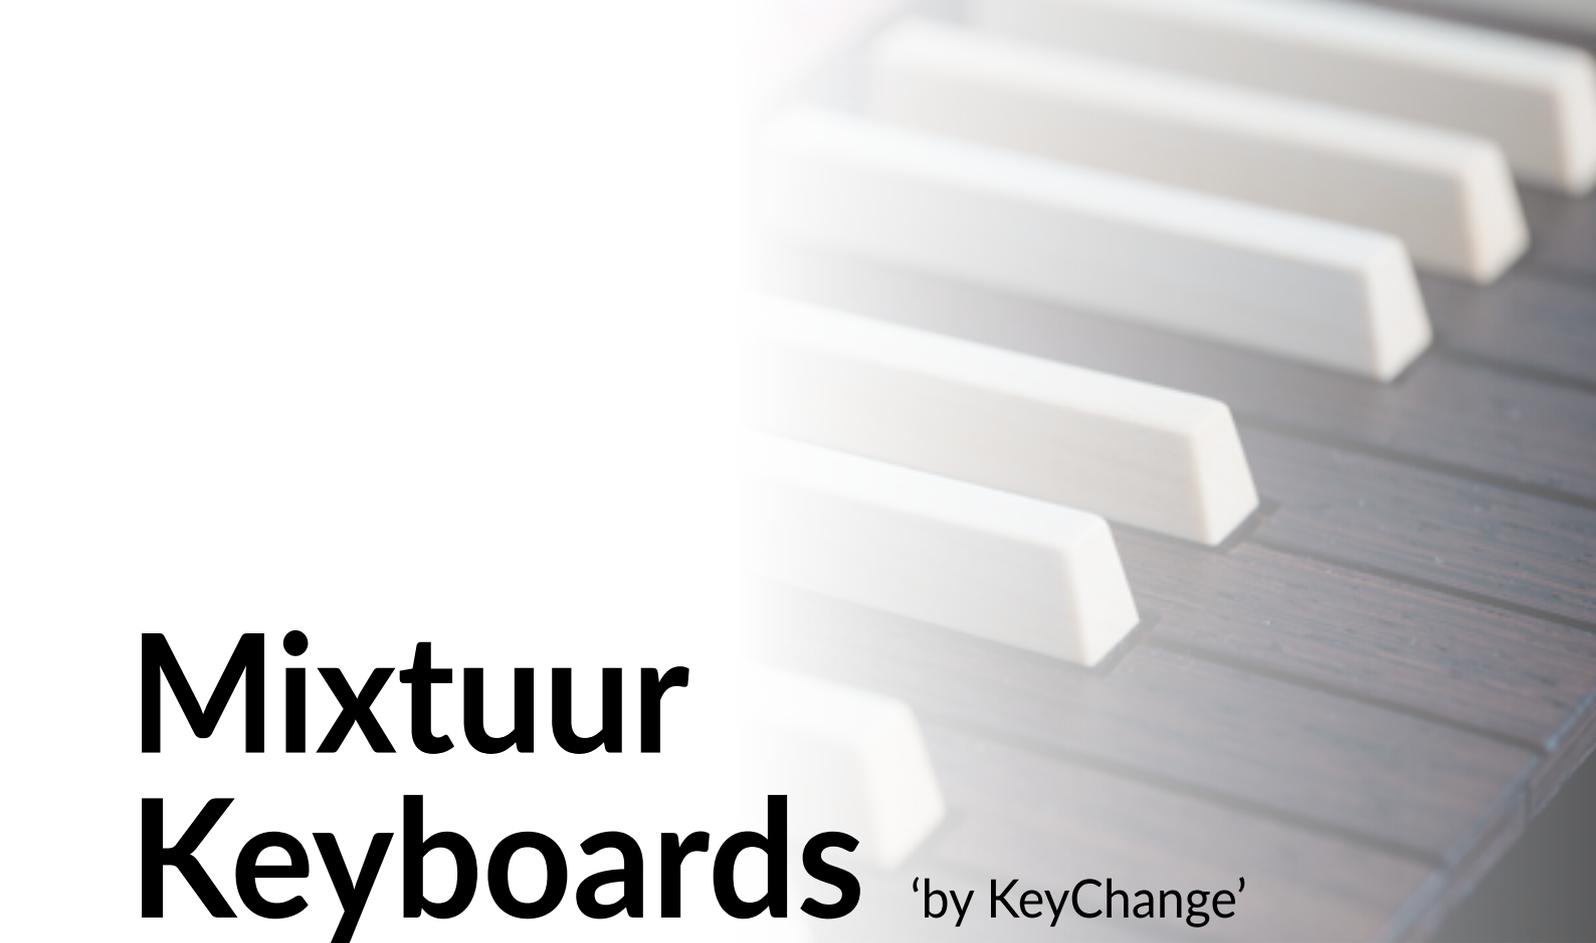

Keyboard Block C – Hauptwerk™ - available from II to V keyboards.

Keyboard Block C – Hauptwerk™ – including 17" monitor and set of exclusive Mixtuur 3-way speakers or round radiators. Available from II to V keyboards.

Keyboard Block C - Custom Made

Mixtuur Keyboards

'by KeyChange'

Exclusive Keyboards with a Unique Touch

Sitting at the organ bench of any Mixtuur, you are immersed in the atmosphere of centuries-old churches. But how do the keys feel on these various authentic organs? Together with our partner KC-Keyboards, we have developed a keyboard with a unique touch. It feels as if you are playing a mechanical pipe organ. These Mixtuur Keyboards 'by KeyChange' are a must-have for every organist. Never before has the playing experience come so close to reality.

Key Pressure and Resistance

The secret of these exclusive keyboards (an option for every model) lies in the use of electromagnets. Thanks to this technology, the keyboards have adjustable key

pressure and response. They have a depth of up to 13 mm, and the key pressure is adjustable up to 250 grams by default. Mixtuur has obtained exclusive rights to extend this up to 350 grams. Besides the realistic experience, this is ideal for practicing music intended for performance on a pipe organ.

Best Materials

The finest Swiss spruce wood is used for the lower keys. This wood has undergone a special treatment, making it resistant to warping—even under extreme conditioning variations. For the key overlays, you can choose from a variety of wood types and other materials. The color, texture, and finish can all be tailored to your

preferences. Each keyboard is handcrafted to meet your exact specifications.

High Quality

These exclusive keyboards meet the BDO standard (a German standard for organ builders). You receive a five-year warranty on your keyboard. In the future, you can always opt for modifications or additional features. This makes Mixtuur Keyboards 'by KeyChange' a solid investment.

Schedule a non-binding appointment in our showroom and experience the touch of these unique keyboards for yourself!

Mixtuur

Church

Virtual and Hybrid Organs for Churches

In many churches, a Mixtuur organ resounds during worship services, gatherings, and concerts. Over the past years, we have completed remarkable projects, bringing together our expertise in developing audio systems and crafting custom furniture. We build organs that are perfectly suited to the space and the number of visitors in the church. But that's not all.

We also use our technology to expand pipe organs with virtual voices. If there is one place where Mixtuur's voices are nearly indistinguishable from real ones, it is in these hybrid organs. Time and again, we provide solutions that align with unique needs and requirements. We would love to tell you more about it.

Mixtuur
YOU CAN HEAR THE DIFFERENCE!
